

Session 7 - Debug Session

UCAS Program 2020

Chloe Lau

August 2020

1 Ah Well...

"It's the last group seminar, oh no I still have many questions! I need help with university selection! Tell me more about university life! How do I strive through A Levels?"

This is why this is called a Debug Session, we will fix the problems with you! Bombard me with questions and I'm here to solve them:)

There is no general notes for this seminar, mostly questions by you, answered by me.

2 Final Words

It has been a pleasure to teach this cohort, and I am surprised by how many Computer Scientists CSFC is producing now, more than double of my year. I wish you all the best in your future endeavours, and good luck with your UCAS preparation.

To keep in contact after the course: you can find my details here.

The repository for all of these \LaTeX notes will be up on my GitHub.

Hoping I will see some of you at Imperial in the near future!

Good luck and have fun with the interviews.

Cheers,
Chloe x
